Welcome
Repository Fringe 2016

Gavin McLachlan
Chief Information Officer and Librarian
University of Edinburgh
The importance of Repositories

- Compliance with Funders
- Impact (including demonstrating impact)
- Collaboration
- Reuse
- Accelerating the research and educational lifecycles
- Reproducibility
- Recognition of the data creators
- Citizen science and broadening participation
- Industrial engagement
Three Themes

- Open Educational Resources
- The Nuts and Bolts of Open
- Making a Difference with Data
Questions

- Who, beyond the academic community, is currently using data from institutional repositories?

- Where or who are the untapped audiences for the research data in institutional repositories?

- How can repositories help researchers tell the story of their data?

- How can repositories help researchers achieve impact with their data?

- What should our vision be for the repository landscape of the future?
