Amarna Rod Fragments

V&A C 706-1936
Opaque dark blue circular section rod fragment with parallel lengthwise striations. l=35 d=3

Ash 1893 1-41 (405)
Opaque dark blue circular section rod fragment. White weathering. l=41 d=6
Opaque dark blue circular section rod fragment. l=25 d=6
Opaque dark blue circular section rod fragment. l=22 d=6

Ash 1893 1-41 (406)
Opaque dark blue circular section rod fragment. l=36 d=3
(*60) Opaque dark blue circular section rod fragment perforated lengthwise. l=22 d=2
Opaque dark blue curved circular section rod fragment. l=44 d=2
Opaque dark blue rod fragment, square section at one end tapering to a circular trail at the other. l=37 d=7
Opaque dark blue circular section rod fragment. l=7 d=4
(*61) Opaque dark blue circular section rod fragment with 2 parallel lengthwise grooves. l=36 d=5

UC 6524
Opaque dark blue circular section rod fragment perforated lengthwise. l=18 d=3
Opaque dark blue circular section rod fragment
perforated lengthwise. \( l=15 \) \( d=2 \)

**UC 22755**

(*62) Opaque dark blue circular section rod fragment with spiral striations. \( l=29 \) \( d=10 \)

Opaque dark blue circular section rod fragment with parallel lengthwise striations. \( l=33 \) \( d=11 \)

**UC 22889A**

Opaque dark blue circular section rod fragment with parallel lengthwise striations. \( l=39 \) \( d=10 \)

Opaque dark blue circular section rod fragment with parallel lengthwise striations. \( l=37 \) \( d=2 \)

(*63) Opaque dark blue circular section rod fragment with a white 'core' in the middle. \( l=23 \) \( d=4 \)

Opaque dark blue circular section rod fragment with parallel lengthwise striations, perforated lengthwise. \( l=24 \) \( d=4 \)

**UC 22909a**

Opaque dark blue circular section rod fragment. \( l=10 \) \( d=3 \)

Opaque dark blue circular section rod fragment. \( l=8 \) \( d=2 \)

Opaque dark blue circular section rod fragment. \( l=10 \) \( d=4 \)

Opaque dark blue circular section rod fragment. \( l=5 \) \( d=4 \)

Opaque dark blue circular section rod fragment. \( l=12 \) \( d=5 \)

Opaque dark blue circular section rod fragment. \( l=12 \) \( d=3 \)

Opaque dark blue circular section rod fragment. \( l=4 \) \( d=3 \)

Opaque dark blue circular section rod fragment. \( l=4 \) \( d=4 \)
Opaque dark blue circular section rod fragment.

- 1=3 d=4
- Opaque dark blue circular section rod fragment with parallel lengthwise striations.
  - 1=22 d=2
- Opaque dark blue circular section rod fragment with parallel lengthwise striations.
  - 1=21 d=4
- Opaque dark blue circular section rod fragment with parallel lengthwise striations.
  - 1=17 d=2
- Opaque dark blue circular section rod fragment with parallel lengthwise striations.
  - 1=18 d=3
- Opaque dark blue circular section rod fragment with parallel lengthwise striations.
  - 1=22 d=3
- Opaque dark blue circular section rod fragment with parallel lengthwise striations.
  - 1=8 d=6
- Opaque dark blue circular section rod fragment with parallel lengthwise striations.
  - 1=4 d=6
- Opaque dark blue circular section rod fragment with parallel lengthwise striations.
  - 1=4 d=6
- Opaque dark blue circular section rod fragment with parallel lengthwise striations.
  - 1=15 d=2
- Opaque dark blue circular section rod fragment with parallel lengthwise striations, bent at one end.
  - 1=17 d=2
- Opaque dark blue circular section rod fragment.
  - 1=23 d=2
- Opaque dark blue circular section rod fragment.
  - 1=23 d=4
- Opaque dark blue circular section rod fragment, curved.
  - 1=15 d=3
- Opaque dark blue circular section rod fragment with parallel lengthwise striations, perforated lengthwise.

Flat flake colour not visible. \( l=35 \) \( w=13 \) \( t=11 \)
Flat flake colour not visible. \( l=30 \) \( w=28 \) \( t=8 \)
Flat flake colour not visible. \( l=13 \) \( w=13 \) \( t=10 \)
Flat flake colour not visible. \( l=13 \) \( w=13 \) \( t=11 \)

UC 22927
Circular section rod fragment colour not visible.
\( l=11 \) \( d=5 \)
Circular section rod fragment colour not visible.
\( l=13 \) \( d=4 \)
Circular section rod fragment bent in to an 'S' curve, colour not visible. \( l=36 \) \( d=3 \)

UC 22930
Cane fragment colour not visible. \( l=16 \) \( w=16 \) \( t=3 \)
Cane fragment with parallel lengthwise striations, colour not visible. \( l=16 \) \( w=10 \) \( t=3 \)
Circular section rod fragment with a trailed tail,
colour not visible. 1=16 d=9
Circular section rod fragment with a trailed tail, colour not visible. 1=12 d=6
Circular section rod fragment with a trailed tail, colour not visible. 1=23 d=6
Circular section rod fragment with a trailed tail, spirally twisted, colour not visible. 1=32 d=8
Circular section rod fragment with a trailed tail, colour not visible. 1=23 d=6
Circular section rod fragment with a trailed tail, colour not visible. 1=22 d=3
Appendix B: Description of the X-Ray Plates

X Ray 1
No information on exposure.

Serabit el-Khadem Fragments

SKR12 Fig. A13
One bubble (diameter c.2mm) is visible near the centre of this fragment.

SKR16 Fig. A13
There are two distinct large bubbles (maximum diameter c.3mm) in this fragment.

SKF276 Fig. A13
This fragment is riddled with tiny bubbles and with several larger bubbles (maximum diameter c.2mm) with no distinct alignment.

SKR1 Fig. A13
There are no bubbles visible in this fragment.

SKR59 Fig. A13
There are six relatively small bubbles (maximum diameter c.1mm) which seem to be grouped above the upper trail but show no distinct alignment.
X-Ray 2
Exposure
Current = 1.5 Ma
Voltage = 75 V
Time = 60 s

Serabit el-Khadem Fragments

SKR59                Fig. A13
There are many tiny "pin hole" bubbles visible in the band on the rim edge.

SKR1                 Fig. A13
There are no bubbles visible in this piece.

SKR7                 Fig. A13
There are several large bubbles (maximum diameter c.2mm) visible. It is possible to detect two lines of bubbles, but as the lines intersect this is not necessarily indicative of anything. The upper line of bubbles seems to be coincident with one of the decorative trails, but the lower line is unrelated to the decorative trails.

SKR11                Fig. A13
There are many small bubbles in this fragment, and there appears to be a coherent line following the edge of the rim.
SKB2

Three relatively large bubbles are visible in this fragment one near the centre with the other two near the foot edge.

SKF276 Fig. A13

There are several large circular bubbles with no apparent alignment visible in this fragment.

SKR12 Fig. A13

There is one bubble (diameter c.2mm) visible near the centre of this fragment.

SKR16 Fig. A13

There are two large bubbles visible in this fragment.

Amarna Fragments

AR10 Fig. A1

The X-ray provides a very poor image of this fragment.

AF3 Fig. A9

This fragment has three very small bubbles in a vertical line.

AR8 Fig. A1

There is one large bubble on the rim edge and a series of small bubbles following the edge of the striped rim
band.

AB5 Fig. A7
There are several large bubbles (maximum diameter c.2mm) and a distinct layer appears as a lighter band within the piece. The larger bubbles seem to be distributed on either side of this layer, and also to follow its curve.

AR15 Fig. A2
There are many small bubbles clustered at the rim edge.

AF64 Fig. A9
There are several small bubbles forming a distinct line which seems to follow the trailed decoration.

AR5 Fig. A1
There are many small bubbles which follow the line of the trailed decoration on this fragment. In addition there is a large rectangular patch visible on the rim edge, but what this may represent is unclear.

AF57 Fig. A9
The X-ray provides a very poor image of this fragment.
X-Ray 3
Exposure
Current = 2 Ma
Voltage = 32 V
Time = 105 s

Serabit el-Khadem Fragments

SKR59 Fig. A13
There are several small bubbles in a sloping line, possibly following the line of the trailed decoration.

SKR1 Fig. A13
There are no bubbles visible in this fragment.

SKR7 Fig. A13
There is one large bubble (c 2mm in diameter) and a few smaller bubbles, all (with one exception) seem to follow the line of the trailed decoration.

SKR11 Fig. A13
There is one large bubble and a cluster of smaller bubbles on the rim edge of this fragment.

SKB2 Fig. A13
There is one indistinct bubble near the edge of the foot on this fragment.
SKF276  
Fig. A13  
There are several (c8) large bubbles and many smaller "pin hole" bubbles distributed randomly through this fragment.

SKR16  
Fig. A13  
There are two large circular bubbles visible in this fragment.

SKR12  
Fig. A13  
There is one large bubble near the centre of this fragment.

Amarna Fragments

AR10  
Fig. A1  
There are many small "pin hole" bubbles with one string of four bubbles following the line of the decorative trails.

AF3  
Fig. A9  
There are a few small bubbles randomly distributed in this fragment.

AR8  
Fig. A1  
There are many small (c 1mm in diameter) bubbles incorporated in the vessel body. On the rim band are two bubbles one quite large (c 3mm in diameter) and
elongated as if following the curve of the rim band.

AB5  Fig. A7
The X-ray provides a very poor image of this fragment.

AR15  Fig. A2
There are several small (c 1mm in diameter) bubbles, and many "pin hole" bubbles randomly distributed through this fragment. In addition, there is one string of bubbles which follows the line of a decorative trail.

AF64  Fig. A9
There is a small bubble in the top trail and 2 strings of 3 bubbles aligned with a decorative trail. In addition, there are 4 bubbles at the edge of one of the trails.

AR5  Fig. A1
There are many small bubbles which seem to follow the line of the trailed decoration. In addition there is a large rectangular patch visible on the rim edge, but what this may represent is unclear.

AF57  Fig. A9
There is a random, widely spaced, scatter of tiny "pin hole" bubbles and a few small bubbles.
Catalogue of Serabit el-Khadem Fragments X-Rayed

SKR1 Ash. E .4486 (D) Fig. A13
Rim fragment from a very narrow diameter necked vessel probably a jug (II) with a handle attached directly below the rim. Opaque black background undecorated. Thin white deposit of salts on the outer surface and a thin red deposit of salts on the inner surface. 1=22 w=11 t=4

SKR7 Ash. E .4486 (R) Fig. A13
Rim fragment with a wide diameter (c.50mm) probably from a rounded cup shaped vessel (XI). Translucent dark blue background with opaque yellow and white festoon decoration on the body and a rope moulded band in opaque white and translucent dark blue. Very thin deposit of white salts on the outer surface and a thin red deposit of salts on the inner surface. 1=37 w=26 t=5

SKR11 Ash. E .4486 (DD) Fig. A13
Rim fragment from a translucent turquoise undecorated bowl (XI) (diameter 100mm). Very thin white deposit of salts on the outer surface. 1=17 w=27 t=5

SKR12 Ash. E .4486 (GG) Fig. A13
Rim fragment from a translucent dark blue undecorated bowl (XI) (diameter 90mm). Thin white deposit of salts on both surfaces. (From the same vessel as SKR16.) 1=23 w=30 t=3
SKR16  Ash. E .4486 (VV)  Fig. A13
Rim fragment from a translucent dark blue undecorated bowl (XI). There is an air bubble just below the rim edge. Thin white deposit of salts on the outer surface. (From the same vessel as SKR12.) l=11 w=24 t=3

SKR59  Ash. E .4486 (i)  Fig. A13
Rim fragment, opaque dark blue background with opaque yellow, white and turquoise festoon decoration on the neck and an opaque white band on the rim edge. There is a rectangular section handle attached just below the rim. Red deposit of salts on the inner surface. l=30 w=26 t=3

SKB2  Ash. E .4486 (y)  Fig. A13
Pedestal base fragment, opaque turquoise background with an opaque yellow band around the edge of the foot. Completely covered in a red deposit. (Fragment joins to SKB3) l=22 w=31 t=5

SKF276  Ash. E .4486  Fig. A13
Body fragment, translucent dark blue background with opaque white long thin festoon decoration bordered by two bands, one opaque yellow, one opaque white. Very thin white deposit of salts on all surfaces. l=22 w=25 t=3
