Interim Handlist

Collection reference  GD 25
Collection title     Papers of Dr Andrew L. Drummond (1902-1966)
Shelfmark(s)         MS DRU 1.1 – MS DRU 1.6

About this handlist  Scan of an older typescript list
The design of the church building is a reflection of the architectural style of the time. The central feature of the church is the large, semi-circular entrance, which is flanked by two smaller arches. The interior is divided into three sections: the nave, the chancel, and the choir.

In the design of the church, attention has been paid to the use of local materials and the integration of the building into the landscape. The use of stone for the walls and the wooden roof is typical of the architecture of the region. The church is also equipped with a bell tower, which was added in the 18th century.

The church has been used for various religious and cultural events throughout its history. It has been a place of worship for the community, but it has also been used for celebrations and other social gatherings.

In conclusion, the church building is an important landmark in the town, and it continues to be a symbol of the community's heritage and identity.
