How to use the Database

APPENDICES 1 (Peebleshire), 2 (Berwickshire) and 3 (E Dumfriesshire)

These appendices are lists of enclosed sites with added description of each site. Each appendix is a list of sites from one county. Sites are listed in alphabetical order. Appendices have been made using Excel Worksheets.

APPENDICES 1.1, 2.1 and 3.1
These appendices include the following information of each site: (Site); national grid number (NGR); enclosed site appearance, i.e. number of ramparts and presence of ditches (Ramparts); rampart construction (Rm. constr.); entrance location (Entrance); type of roundhouses within the enclosed site (Roundhouse); size of the enclosed site (where possible to measure), measured in hectares (Size (ha)); size of annexes, when they are attached to the enclosed sites, measured in hectares (Annexe (ha)); altitude, measured in metres (OD (m)); and the note of the other possible features, such as chevaux de frise (Other).

APPENDICES 1.2, 1.3, 1.4, 2.2, 2.3, 2.4, 2.5, 3.2, 3.3, 3.4 and 3.5
In these appendices, more detailed data are provided on different types of roundhouses (ring-groove, ring-ditch, stone-walled, timber-built; see section 2.5.). These databases consist of: the name of the site (Site); number of roundhouses within the settlement (No. of RH.); external diameter of roundhouses, measured in metres (Ext. Dia. (m)); internal diameter of roundhouses, measured in metres (Int. Dia. (m)); wall width, measured in metres (Wall width (m)); width of the ring-ditch, measured in metres (Ditch width (m)); entrance location (Entrance) and other possible features, such as porches or scatters of stones, which are sometimes present at the roundhouses (Other). Not all of the mentioned categories appear in all databases of the roundhouse types. If the data is absent/ not visible or in such a poor condition that it cannot be used without major restrictions, a question mark (?) has been used in each database.

APPENDIX 4- Gazetteer of sites
Enclosed sites from all three counties are listed in alphabetical order. This appendix includes additional descriptions of individual sites, listed in Appendices 1 – 3, such as references, plans of each individual site and a map showing landscape locations of each individual site. Multi-period sites, which do not have different phases noted on the illustration, have added
sketch of different phases with different colour lines showing different phases and dotted lines showing possible different phases of sites:

- blue-phase 1,
- red-phase 2,
- green-phase 3.

**Abbreviations used**

constr. – construction
dia. – diameter
e – earth
ext. – external
int. – internal
NGR – National Grid Reference
no. – number
r-d – ring-ditch
r-g – ring-groove
RH – roundhouse
Rm. – rampart
s – stone
t – timber
