- EDDIE
- Archer
- Eleanor
- Data Safe Haven
- DataShare
- DataSync
- SubVersion /Gitlab
- Digimap
- Digital Imaging

... and many others!
Digital Research Services

Research community

Services and resources

Service Providers
Our aims

• To support researchers in getting the best value out of the research services available to them

• To support the research community in contributing to the development and long-term sustainability of the digital research services provided for them

• To support the university in building capacity for computational, data-led research and the long-term stewardship of such research
Working with you throughout the Research Lifecycle

- Clarify data and compute requirements
- Identify services that meet your needs
- Develop your digital research skills
- Scale up your projects
- Improve your data management skills
- Meet funder requirements
- Help the research community shape services
How we can help: Open Research

• Open Data: Open Collections, DataShare
• Open Code: GitLab, Notable (what does the community need?)
• Open Access Publishing: OJS and Specialist Guidance
• Pure/DataVault linking
How we can help: Sensitive Data

- Research Data Service: guidance, DMP Online
- Guidance on secure processing
- Information security, Regulations (e.g. GDPR), Data provision contracts
Finding the missing pieces!
Digital Research Services

Digital Research Services provides a single point of access to all of the data and computing services available to researchers at the University of Edinburgh.
